

Privacy Policy

No personal data collection

Embody does not collect or store personal information such as names, addresses, private keys or sensitive data. All information used is either publicly available on the blockchain or explicitly provided by users (e.g., display names, prompts or transaction amounts). Passwords, private keys and government ID numbers are never requested or stored.

Types of data we process

1. Public blockchain data

Wallet addresses, transaction hashes and on-chain activity (used to verify ownership of NFTs or tokens, record game interactions, etc.). This data is inherently public and recorded on the blockchain. We may store blockchain addresses that are needed to provide our Services.

2. User-provided inputs

Embody may in the future store information including prompt input and output to improve its services. That information is not tied to your personal information

3. Orchestrator container data & logs

Embody may, at any time, store information derived from the containers/code that orchestrators who are paid from Embody run. Such data should not be accessed from the orchestrators except agreed in written form and signed by an Atumera director

Children's privacy

The privacy activity is not directed at children under 13, and no personal data is collected from them. If Embody ever collects personal data from users under 13, it will comply with COPPA by obtaining verifiable parental consent and allowing parents to review and delete children's data

Privacy Rights

Since the organizers do not collect or store any personal data, there is little personal information to access, correct, or delete. All information used is either publicly available on the blockchain or provided by you through our interface.

Changes to This Policy

We may update this Privacy Policy from time to time. We will notify you of any changes by posting the new Privacy Policy on this page and updating the "Last Updated" date.
